Activation

Activation included two types:

l. Online

ll. Offline.

Online means that user activate NVM2000 on computer connected to the internet. Offline means that user activate NVM2000 on computer without any internet access.

Activation offline

In these cases, you need to prepare a machine with internet access which will play as a proxy to our INSCAPE DATA license server. You send out a request file from the NVR machine to the proxy and reply to INSCAPE DATA license server. INSCAPE DATA license server issues a license file after having authenticated request file. Save the license file on NVM2000 machine to make the NVM2000 work.

As you open "INSCAPE DATA Main Console", you will see a confirmation column shows an information. Please click N (No).

Note: The SN (Serial Number) is included in the package that you purchase for IP camera licenses.

Press "General Setting" and click "License Manager".

Choose "offline activation" as Activate type.

License Management Tool Activate Transfer	
SN Channel Product Status	2011/08/03 17:10:11

New Folder Yes Cancel

Click OK when you see this confirmation column.

"Offline activation" files will show at where you save. At this example, we save "Offline activation" files on desktop.

Click to open ""Offline activation" files

continue to open "OfflinePack".

Please Click to open "OffLineTool"

You will see a column "Offline Tool" like the following

P Offline Tool		x
Information:		
Activate new SN.		~
Please input SN:		
		~
- Input type		
Server Information file path:	C:\Users\J	
SN input:		
Input SN:		
C Import SN file:		
C Activate from dongle		
	Activate	

Please key in SN numbers, for example: 1234-ABCD-5678-0000 then click Activate bottom.

Note: The SN (Serial Number) is included in the package that you purchase for IP camera licenses.

P Offline Tool	×
Information:	
Activate new SN.	^
