

AIRETHER™ SB3000 TRIO APPLICATION NOTE

System Reference Diagram

The SB3000 Trio is known for its three 2x2 MIMO radio paired with MIMO antennas to triple the amount of access capability to 900 mbps compared to the SB3000 Solo or its flexibility to configure each radio to backhaul or access point. Typical deployment looks like the following:

Applications

1. Education, e.g., very large campuses with intensive WIFI traffic
2. Federal and Government market
3. Carrier
