Inscape Data Corporation is proud to be featured as a Premier Sponsor at WISPCON VI, Las Vegas, NV.

Milpitas, CA (October 18, 2004) Inscape Data Corporation, an innovative developer of outdoor IEEE 802.11 wireless AirEther™ Wireless Systems and network video surveillance AirGoggle™ Video Security Systems products, is pleased to announce its Premier Sponsorship status at WISPCON VI, located in Las Vegas, Nevada.

The conference, which will start with a pre-conference on Wednesday, October 27, will end on Friday, October 29, 2004. It features a variety of speakers, sponsors, and exhibitors. The keynote speaker for the pre-conference, FCC Chairman Mr. Michael K. Powell, will present an FCC Oversight on License Exempt Wireless Broadband. Other speakers include the FCC's Mrs. Lauren Van Wazer, Dr. Robert Pepper, and Mr. Julius Knapp. Mrs. Lynn Kline, Vice Chairman of PART-15.ORG, will give the final keynote address.

Mr. Michael Anderson, Chairman of Part-15, states, "We are thankful for Inscape Data's sponsorship of this great event, and we believe their collaboration with us shows Inscape Data's commitment to further promoting wireless technology and related products to the marketplace."

Various exhibitors and sponsors will be featured at trade booths and product demonstrations throughout the conference.

Inscape Data is proud to be featured in a pre-conference workshop, to be held in Salon D, on Wednesday, October 27, from 1:00 p.m. to 5:00 p.m.

During this workshop, Messrs. Richard Ho, Sr. System Engineer, and Soo-Hang Ryu, VP, System Engineering, of Inscape Data will present an overview of the company's signature AirEther™ Wireless System and AirGoggle™ Video Security System products . They will demonstrate the quick configuration setups for deploying the reliable outdoor license-free wireless systems and hands-on configurations of the AirGoggle™ IP addressable MPEG4 network video surveillance camera systems.

Inscape Data will also provide a configuration track on Friday, October 29, from 2:30 p.m. to 3:30 p.m. at their booth, number 210. Mr. Ho will discuss Inscape Data's AirEther™ Carrier Class Outdoor Wireless Systems. This session will present the advantages of the AirEther™ system, including AirEther™ application scenarios with AP11 'HotSpot-In-a-Box', RB11 bridge/router, and CB11 'CPE In-a-Box'. In addition, the configuration demonstration will include a 5-step quick software setup of an AirEther™ system.

About Inscape Data Corporation

Inscape Data is an industry leader in wireless communication and network video surveillance systems. The company offers a full suite of products lines, including their AirEther™ Wireless Systems with IP68-certified all-weather enclosure, a broad selection of 2.4 GHz antennas and their AirGoggle™ Network Video Security Systems based on MPEG-4 video compression standards.

The company was founded on a culture of business excellence and product innovation. With strong, dependable and proven manufacturing capabilities in Taiwan and South Korea, Inscape Data is committed to delivering products that provide differentiated value to its customers and partners worldwide. Continuing in this pioneering spirit of excellence and innovation, Inscape Data looks forward to developing and introducing newer waves of technology solutions with a unique competitive edge to the marketplace in the future.
